INCOGNITO

IdeNtity verifiCatiOn with privacy-preservinG credeNtIals for anonymous access To Online services

Project number: 824015
Project website: https://incognito.socialcomputing.eu/
Duration: 48 months Total
Cost: EUR 1,173,000
EU Contribution: EUR 1,173,000

INCOGNITO is funded from the European Union's Horizon 2020 Research and Innovation program. Grant Agreement No. 824015

MISSION

The overarching goal of INCOGNITO is to combine state-of-the-art technologies in a platform that allows users to easily understand what is needed to access online services with respect to their privacy and be able to prove specific attributes of their identity or their whole identity.

APPROACH

INCOGNITO is an innovative and state-of-the-art platform, the foundations of which revolve around the users' privacy. The approach to achieve that includes utilization of:

- Qualified Anonymity
- Identity Acquisition and Management
- User-friendly environment
- Blockchain Technology
- Natural Language Understanding
- Trusted Computing

Main Goals

Infrastructure that Supports Qualified Anonymity to ensure unlinkability and untraceability of the users' activities

Identity Acquisition and Management Platform that allows the users to quickly and securely Acquire Identity Attributes from Physical ID Documents and Online Identities

Advanced UI/UX AI-based Assistant that guides and informs the users about aspects of their Identity Management, as well as possible actions to take

Blockchain Empowered Identity Management to ensure immutability and transparency for all parties involved
